

JB SERIES

JUNCTION BOXES

FEATURES

- Connects 1 to 4 Strain Gauge Sensors
- Aluminum housing
- Ideal for use in hostile environments
- Protection class: IP65
- Custom electronics available upon request
- Custom configuration (up to 6 load pins) available upon request

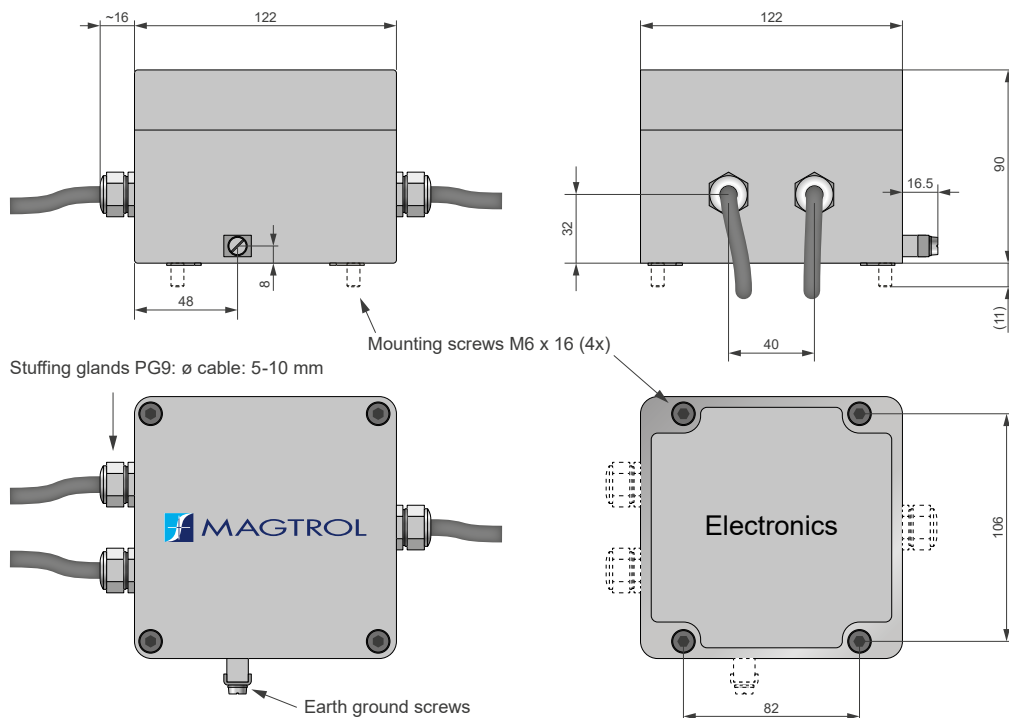

Fig. 1: JB 113 | 2 Channels Junction Box

DESCRIPTION

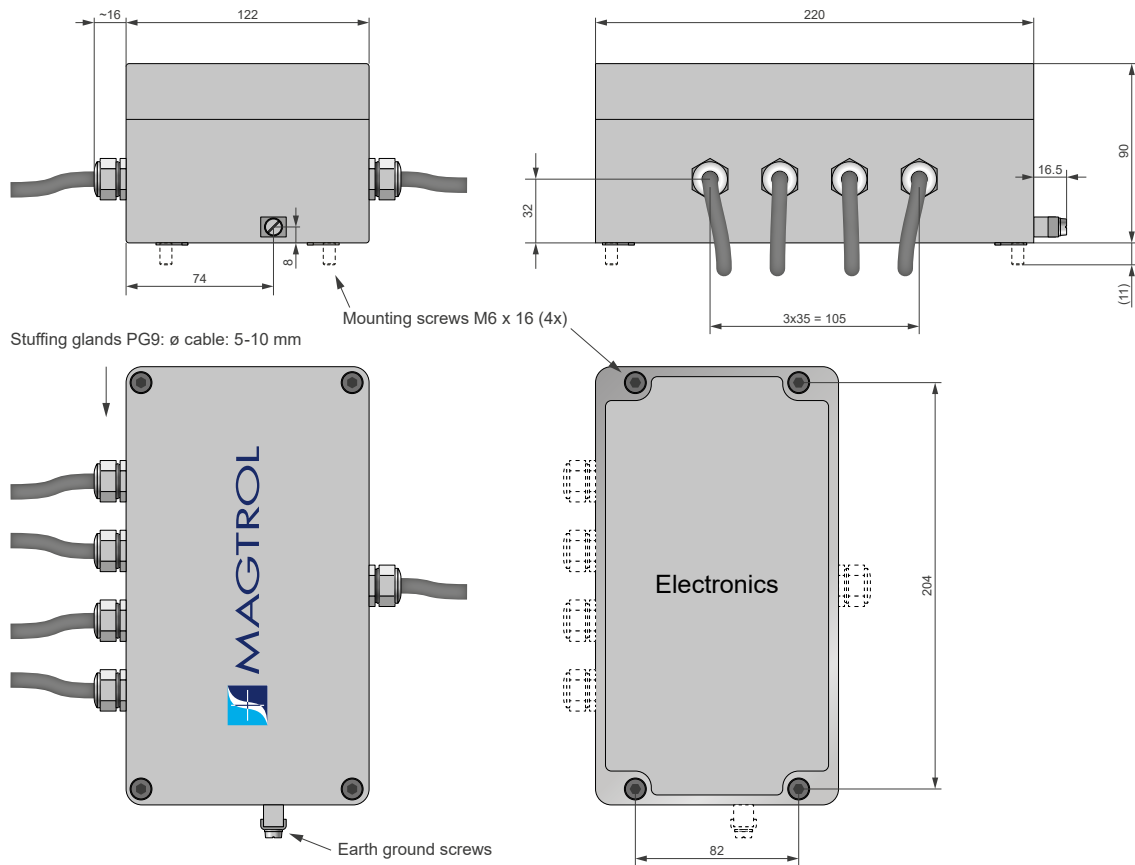

The JB Series Junction Box from Magtrol are designed for connecting 1 to 4 strain gauge sensors to a Load Measuring Unit (e.g. LMU210 Series).

This element fits perfectly into a load measurement system and is specially designed to withstand hostile environments according to the same criteria as the LMU210 Series.
